

What is the Problem?

- Sustainability
- Economic Development
- Economic Competitiveness
- Network Capacity
- Supporting Infrastructure
- Private Sector Support
- Sufficient Demand

What Does Success Look Like?

Is there sufficient ***demand*** to support direct service?

What ***facilities*** are required to support expansion?

How do we quantify ***stakeholder commitment***?

What ***resources*** are required?

What's In it for me?

- Air carriers
- Freight Forwarders
- Airport
- Shippers
- Economic Development
- Neighborhood

Is there an an economic case to create demand for the new service?

Defining the Current Air Cargo System

Start with Most Recent
Airport Masterplan

Create an inventory of buildings and tenants
Identify current air cargo by carrier and markets served
Are additional cargo facilities and handling systems
required to support new service?

Are current
connections/services
adequate to support
new service?

Truck parking /Highway access points/gates
Integrated express carrier facilities
Customs
Temperature control

Is there a trained
workforce to
support
expansion?

Is there sufficiently trained labor in the region
Are there training programs
